Questions about the Course

How useful was the lab for achieving the goals of the course?

Describe the one best thing about the lab section that was effective in helping you learn.

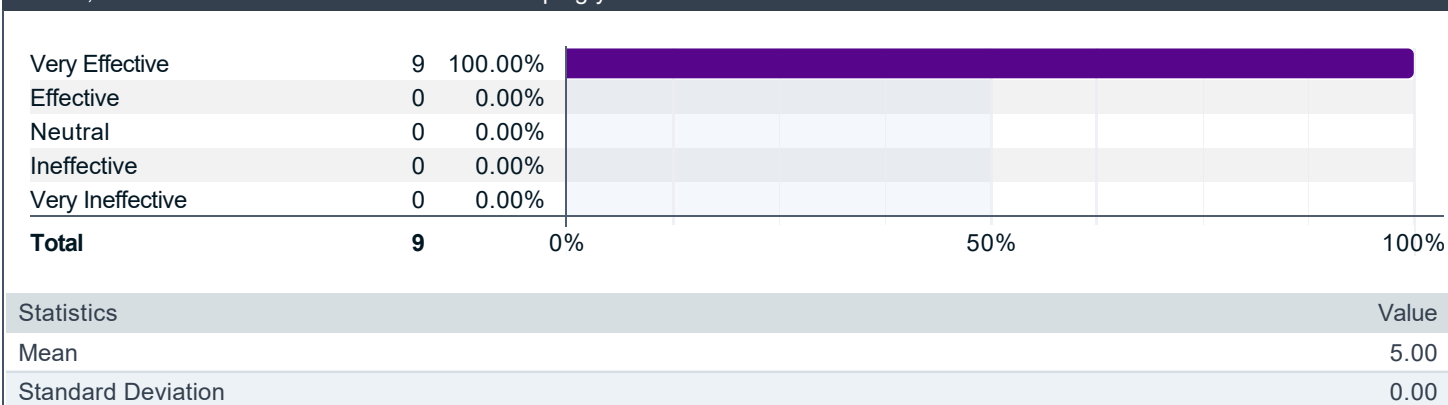

Comments
Help us understand what we should care about during the lab
The lab put many things into context and let us collect data and perform calculations that waere useful to lecture materials.
my instructor was good
Marcus!
My instructor
Marcus went over one homework problem and key theoretical concepts before each lab for roughly an hour and that was very useful for both the lab and lecture component of the course.

If you could suggest one thing to improve the lab, what would it be?

Comments
The lab is perfect, there is nothing to improve.
some labs were extremely repetitive and not very useful
Try to align the lectures and labs with content that is being covered. I was very helpful when it did but confusing when it often did not
Allow paper copies of the lab manual
There are many parts to each lab and sometimes they can run long.

A fantastic instructor, his office hour helps me a lot and doing better for the exam.
I will miss you
love love love him
Marcus thank you for teaching me all of Physics 1 and Physics 2 ... actually one of the better teachers I've had and you're just a TA. You should definitely be a professor. Thank you for caring.
He was so amazing! Totally cares about his students and makes time to help them do their best.
Great!
Marcus is actually the best TA EVER. He held multiple office hours, even for personal ones upon requests. I don't think I would be able to survive the course without his help. Thank you soooo much!!!
Marcus is one of the best TA's I have ever had. His knowledge of physics is very strong and he is ALWAYS available for questions and answers. He tries very hard to include everyone in the class and to make time for office hours (which I might add are always full because he is very intelligent). I took Marcus both semesters and am incredibly happy that I did. He provides feedback on post lab and point by points where you gained and lost points which is very useful and points to how much effort he puts in. Lastly Marcus is never behind on grading and is always on time.
